

## Corona appendix to the Volunteer declaration

### Policy of entry into Israel during the coronavirus period

*The State of Israel allows entry for international volunteers following the new regulations.*

- I am aware that a preliminary approval from the Population and Immigration Authority or the Ministry of Foreign Affairs is required before boarding an aircraft (**valid for a period of 14 days**).
- Entry to Israel will only be permitted if you have a **negative PCR test result from 72 hours prior** leaving the country of origin. At your arrival to Israel, you must take an additional PCR test and you will be asked to have a serological test for Identification of antibodies in the blood.
- You will then be asked to enter isolation, the isolation time will be in accordance with the results of the serological test, if antibodies are detected in the serological test (evidence of vaccination or recovery from Covid19) they can leave the isolation immediately. If the serological test results are negative, after 10 days in isolation you will be asked to do another corona PCR test and if the test comes out third - you can leave the isolation.

#### Insulation conditions:

- Upon arrival in Israel, a representative from the kibbutz will pick you up and bring you directly to the kibbutz for isolation. (Please note - according to the laws of the State of Israel, it is strictly forbidden to travel by public transport, including taxis at the entrance from abroad)
- Upon arrival at the kibbutz, the coordinator will receive you on our behalf and bring you to the place of isolation, during all the days of isolation, the coordinator will make sure you get: 3 meals a day, clean laundry (washing machine / laundry services) Internet available (WIFI).

*According to the laws of the State of Israel, it is strictly forbidden to violate the conditions of isolation until a permit for release from isolation is obtained, subject to the results of the Corona test.*

*Foreign nationals leaving Israel before the end of their mandated isolation period without special permission will be in violation of the laws of the State of Israel and their next entry to Israel, will not be approved.*

- After isolation, the volunteer undertakes an obligation to be vaccinated with the corona vaccine. The responsibility of the volunteer vaccination lies with the kibbutz volunteer coordinator. If there are additional payments - the payment will be applied to the volunteer.
- A foreign national entering Israel (who has recovered from Covid19 or has been vaccinated) is required to act according to the isolation conditions and tests of the Ministry of Health, including a serological test and a self-financed electronic bracelet. - **A recovering person who does not have a recovery certificate will submit the results of a serological examination**
